

ALCONSULT International Ltd. and GEOSEIS Inc. form alliance to deliver GG&E consulting, interpretation and technology services to the Canadian and International marketplace.

Calgary, Alberta - April 25, 2007 - Alconsult International Ltd. and GEOSEIS Inc. are pleased to announce an alliance whereby both parties will market and together supply GG&E consulting, interpretation, and technology services to clients seeking leadership, innovative ideas and technical support for new venture or existing projects in the Western Canada, Frontier and International arenas.

GEOSEIS Inc., a growing GG&E consulting and technology services company, provides Canadian and International project interpretation and mapping services to assist clients. *In the technology services arena GEOSEIS specializes in delivering software applications and toolkits together with associated work flows, data preparation, analysis, integration, and support. They are a progressive team of bright and capable geoscientists, engineers, and technology professionals with extensive data and business expertise (www.geoseis.ca).*

Alconsult International Ltd., a multi-disciplinary consulting and training company provides senior GG&E interpretation and project management services to clients in Canada and internationally with emphasis on upstream exploration, development and assessment of oil and gas projects. *The firm offers expertise both in conventional oil and gas applications and in reservoir and drainage strategies for application of new in-situ heavy oil technologies (www.alconsult.net).*

To further strengthen the alliance, Alconsult International Ltd. has relocated to Suite 600, 744 -4th Avenue S.W. Calgary, adjacent to the offices of GEOSEIS.

Together the firms will now offer clients a broader range of integrated interpretation and technology solutions for E&P projects worldwide.
