

GEOSEIS Inc. and Spotfire Partner to Deliver Energy Focused Analytics Solutions in the Canadian Market

Deliver support, integration, work flow solutions and expertise to Energy Industry-focused organizations utilizing Spotfire analytics

Calgary, AB, CANADA - April 30, 2007 – GEOSEIS Inc. and Spotfire, Inc., the Information Insight CompanySM, are partnering to provide a local presence for Spotfire's interactive visual analytics platform for the Canadian Energy Industry. GEOSEIS will deliver marketing and technical support as well as work flows and consulting solutions to organizations utilizing or investigating Spotfire[®] enterprise analytics platform. GEOSEIS and Spotfire are targeting support to energy-related organizations throughout Canada in the following industry sectors: oil and gas, engineering, mining, pipeline, power, environmental, valuations and related services. Such organizations routinely require complex data analysis. Spotfire is a support toolkit for such endeavors and enables insights into technical problems, quicker and improved decision making, breakthrough solutions, and productivity gains. GEOSEIS strongly believes there is significant untapped potential of Spotfire's enterprise analytic platform to assist in gaining a competitive advantage from actionable insights delivered through enhanced analysis of data.

Spotfire's enterprise analytics platform offers an easy-to-learn, interactive, visual approach to complex data analysis that empowers individuals and asset teams to quickly and creatively see trends, patterns, and unexpected relationships in data from many sources. Although the Canadian Oil and Gas Industry has significant public domain data that can be quickly accessed for analysis there is an inherent paradox in that these public databases are often accessed and investigated via the same "windows". Competitive technical advantages can be derived through the utilization of Spotfire's enterprise analytics software which can visually and interactively analyze a changing, customized and integrated set of public and proprietary data.

About Spotfire, Inc.

Spotfire, the Information Insight CompanySM, is a leading provider of enterprise analytics software that helps professionals quickly discover new and actionable insights in information. For thousands of business professionals faced with day-to-day decisions, Spotfire offers a visual and interactive analytics experience that helps them make decisions with speed and confidence. Distinguished by its ease of use and analytic power, Spotfire software rapidly reveals unseen threats and illuminates new opportunities, creating significant economic value. Spotfire's customers include industry leaders among the Global 2000 that have deployed Spotfire analytics to gain an information advantage over their competitors.
